1,613,127 COVID doses given in Alberta October 10th, 2022 - April 20th, 2024						
AZ	Janssen	Moderna	Novavax	Pfizer	XBB	Total
1,420	4,720	215,840	547	602,833	787,767	1,613,127

Danielle Smith - Premier of Alberta since October 2022

April 2021
"There will be a reckoning after this. No wonder the pharma companies were shielded from liability"

October 2021
"I'll reprint the best advice here, because it is the simplest way to get the shot in the meantime"

November 2021
"Johnson & Johnson, the one I took, is not recommended for women under the age of 50 because of a higher incidence of blood clots."

When did the media and politicians know AZ/Janssen and other shots were dangerous?

Danielle Smith was a Media Personality in 2020-2022 and Premier of Alberta from 2022-2024.

In October of 2023 Premier Danielle Smith and her **"Political Allies"** pushed the UNTESTED XBB shots on Albertans 6 months old and up in the most aggressive and dangerous way. As soon as 4 weeks – 3 months after previous shots or infections. At the same time as the Flu Shot (against NACI and PHAC recommendations). I had a meeting scheduled to stop that rollout which was then cancelled to protect Danielle's **"Political Allies"** and their connections to COVID crimes that started in 2020.

In April of 2024, Premier Danielle Smith and her **"Political Allies"** started the push for the XBB Booster shot to 6 months old and up. Some are now on their 4th XBB shot in 6 months.

Totally agree. I'm convinced I had it last March when it was impossible to get a test. **There will be a reckoning after this. No wonder the pharma companies were shielded from liability.**

Thanks (just a tiny piece of what I have been gathering for over a year now).

When people say the 2021 numbers include other vaccines... this shuts them up. This is the data just for COVID vaccines which covers a little bit of the end of 2020.

VAERS (USA)

<https://medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=CAT&EVENTS=ON&VAX=COVID19>

As of April 16th. 3,186 reported deaths out of 86,080 adverse reactions reported for JUST COVID Vaccines.

This is up from data just looking at 2021 in the initial table I sent.

In the UK.

Although it is reported that 33 million people in the UK have been vaccinated (by April 26th, 2021), only 12 million have had the second dose. The second dose in trials caused the most severe reactions.

Again, adverse side effects in the UK (like the VAERS system in the US) are heavily underreported.

However, compared to all vaccinations in prior years, the COVID vaccines are seeing almost unbelievable reports of short term death and adverse reactions. From the Oxford Vaccine Group in the UK in 2019.

<https://vk.ovg.ox.ac.uk/vk/vaccine-side-effects>

"In the UK between 1997 and 2003 there were a total of 130 reports of anaphylaxis following ALL immunisations. Around 117 million doses of vaccines were given in the UK during this period. This means that the overall rate of anaphylaxis is around 1 in 900,000."

That being said, in the UK the numbers are worse for reactions in particular.

Pfizer As of April 16th (data up to the 14th).

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/977005/COVID-19_mRNA_Pfizer-BioNTech_Vaccine_Analysis_Print.pdf

334 reported deaths out of 143,034 adverse reactions reported. AstraZeneca

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/977006/COVID-19_vaccine_AstraZeneca_analysis_print.pdf

627 reported deaths out of 548,495 adverse reactions reported. 'Other' Covid Vaccine

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/977007/COVID-19_vaccine_brand_unspecified_analysis_print.pdf

12 reported deaths out of 1,611 adverse reactions reported.

In the UK between 1997 and 2003 there were a total of 130 reports of anaphylaxis following ALL immunisations.

COVID Vaccinations As of April 16th, 2021

ONS UK	Reactions	Deaths	Months	Per month Reactions	Per month Deaths
AZ	548,495	627	3.5	156,713	179
Pfizer	143,034	334	3.5	40,867	95
Other	1,611	12	3.5	460	3
Total	693,140	973	3.5	198,040	278

Then again, Kenney said today (attached) that 10% of Albertans had immunity because they already had COVID. Yet we have only had 181,806 cases (4% of Albertans) have had it... most have been asymptomatic and never knew they had it (like my brother in law in Texas who just discovered he had antibodies after giving blood. He hasn't been sick since December 2019 around the time most people got sick.. but were not dying).

Based on this, why are we not doing widespread antibody testing instead of wasting all those useless and dangerous vaccines and useless PCR and lateral flow tests?

Up to now a lot more people caught it after full vaccination than anyone who was recorded of potentially getting after natural immunity.

Thanks [REDACTED – Medicine Hat MLA assistant],

As we continue to push these experimental vaccines, maybe a question can be raised in caucus. I am using the US data but the UK and France mimic this pattern as do many other countries reporting. Maybe a story for Danielle to bring on Deena Hinshaw or Tyler Shandro (or Verna Yiu) to answer.
